🧠 SKILLS

Fullstack development
I am proficient in languages such as JS and TS, as well as frameworks like Vue.js and React for frontend development. My expertise also extends to the backend, where I am comfortable with tools such as Express.js and Nest.js.

Software & Mobile Development
I excel in languages such as Dart, specializing in mobile app development using Flutter. With Dart, I craft efficient and feature-rich applications for various platforms, ensuring a seamless user experience. My proficiency extends to both frontend and backend development, allowing me to create comprehensive solutions tailored to diverse project requirements.

Server & Database
I possess advanced skills in managing databases, particularly MariaDB and SQL. I am adept at designing and optimizing database schemas, writing complex queries, and ensuring data integrity and security. My expertise extends to server-side development, where I leverage my knowledge to build robust and scalable server applications.
